# Drill down report ssrs

Drill down and drill through report in ssrs. Ssrs report builder drill down. Ssrs add drill down to existing report. Multiple drill down report in ssrs. Drill down chart report in ssrs. Ssrs drill down report tutorial. How to remove drill down in ssrs report. Ssrs open drill down report in new window.

After that, format the text box. Just increase the font size and make them bold. Then click on the Visibility tab. Creating a Drill down group report means, allowing user to expand or collapse a section of a report to show customer details in place based on Grouping. How do you change the behavior of the +/- signs (which is not always intuitive)? There are two additional things to add to the above technique to make this work. Now click on OK button, and see the report preview. Click Hidden, check the Visibility that can be toggled... Lets format the report, set font size, back ground color for header columns. This will correct the +/- sign and you are all set to provide all details by default with the ability to collapse groupings for readability. Once you click on Group Properties..., a Group Properties window opens. 1) On your Visibility tab (of the Details Grouping), change the Initial Visibility to Visible. However, controlling how data is displayed can be frustrating without understanding some of the subtleties of the Reporting Services report designer. After that, lets take one text box and give the name to report. 1) Right click on the details line and select Edit Group (even though it's a details line), or 2) select the entire table, right-click, select Properties, then the Groups tab, then Details Grouping. Select the Supplier Region field from the dropdown. Next Steps You can use a similar technique (technique #1) A to show and hide columns as needed. Users can get confused and turned off, if the presentation of data is less than perfect. For the toggle item, you can use an existing column header (but it can't be one of the hidden ones), or try adding an extra textbox or even an image (i.e. like a button) right above the table.
